Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-21 and 24-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Schoenhard (U.S. Patent Application Publication No. 2004/0224020).

The Schoenhard reference teaches compositions used for the treatment of pain, specifically by providing analgesia (See Sections 0128 and 0129). The compositions may be in the form of a tablet or capsule that maybe administered once or twice daily (See Sections 0017 and 0023-0026). In one embodiment, an opioid antagonist such as naltrexone or nalmeferne may be formulated in combination with a non-opioid drug such as acetaminophen (See Section 0134). Naloxone is also listed as a suitable opioid antagonist (See Section 0046). The active agents may be in the form of pharmaceutically acceptable salts including the hydrochloride salt (See Section 0135). Acidifying agents, alkalizing agents, and antioxidants may be provided in the disclosed compositions to promote product stability or to inhibit oxidation (See Sections 0141, 0143 and 0145). The prior art also acknowledges that naltrexone is known to be administered in amounts of 50 mg (See top of Section 0046).

Art Unit: 1618

As the limitations of the instant claims have been met, the instantly claimed invention is thus anticipated.

Claims 22, 23 and 35 are rejected under 35 U.S.C. 102(a) as being anticipated by Sherman *et al.* (U.S. Patent Application Publication No. 2003/0191147)

The Sherman *et al.* patent discloses a combination of acetaminophen and naltrexone that does not include an opioid agonist (See Sections 0242 and 0243).

As the limitations of the instant claims have been met, the instantly claimed invention is thus anticipated.
